PRICING GUIDE

Beauty is more than skin deep—it's a lifestyle. Healthy skin is the secret to aging gracefully and flawlessly, and our holistic approach at Charette Cosmetics brings a new philosophy to aesthetic treatments.

Our aesthetic centers feature the most cutting-edge and groundbreaking treatments, devices, and procedures to address your every skin concern while enhancing your self-confidence and commitment to self-care. Our services range from fillers and injectables to lasers, microneedling, and PRP to customized facials and body contouring. At Charette Cosmetics, we believe that just like each person's DNA is unique to them, and so should their aesthetic treatments. Therefore, we take a customized approach to achieve the best possible results. We also tailor our treatments to your specific goals and timeline, allowing all our patients to have an excellent outcome and the experience they deserve.

Charette Cosmetics is led by master medical aesthetician and cosmetic practitioner Paul Charette. Paul's passions for helping others feel confident and beautiful about their skin is evident in all aspects of Charette Cosmetics. He specializes in skin rejuvenation and travels the world learning unparalleled techniques and researching the ultimate skincare products to help you achieve your goals. Paul is results-driven and confident that you will achieve your skin goals at Charette Cosmetics.

Our mission at Charette Cosmetics, the world's premier celebrity medical spa, is to help you create flawless, radiant, and youthful skin while simultaneously creating the blueprint for self-care and self-health. You are the most important person to us, and our keen eye and tailored approach to aesthetics help slow the aging process while creating the best and most beautiful version of yourself.

Paul Charette

THE TREATMENTS

CHEMICAL PEELS

There's nothing quite like the power of a good chemical peel. This skin rejuvenating treatment is a quick and effective way to remove pigment, smooth the skin's texture and tone, and refresh the skin via a simple exfoliation process. Acids are the primary peeling agents used in professionally-administered peels, and there's plenty to know about these skin-perfecting treatments.

A chemical peel is an acid-based exfoliating and resurfacing treatment that accelerates the rate at which the skin sheds. Every 28 days, the skin sheds its dead cells to reveal fresh new skin cells underneath. Chemical peels help lift away dead skin cells from the surface.

404.430.4378

There are various types of peels available based on the ingredients used. Some chemical peels work on a superficial level, while others penetrate deeper into the skin. The best chemical peel for you depends on the desired effect, skin tone, and current skin concerns.

Exfoliating chemical peels are popular because they offer many benefits, including stimulating collagen, decreasing the appearance of fine lines and wrinkles, improving discoloration, melasma, and sun damage, clearing up acne, and rejuvenating the skin.

At Charette Cosmetics, we offer two levels of chemical peels: Level 1 and Level 2.

CHEMICAL PEEL LEVEL 1

\$ **350** +

Level 1 peels use salicylic or glycolic acid to promote cell regeneration and smooth and improve the skin's texture and tone. They also improve discoloration, the appearance of fine lines and wrinkles, and the skin's overall complexion. These popular peels rely on a proprietary blend to break down dead cells and gently remove the top layer of the skin.

MELANX – CHEMICAL PEEL LEVEL 2

\$ **950** +

MelanX is a much more powerful and intense medical-grade chemical peel for the treatment of dark spots, acne scarring, sun spots, hyperpigmentation, melasma, fine lines and wrinkles. This kit comes with a 20-25 day post-care skincare regimen including a prescription-strength bleaching cream, retinol serum, a soothing balm, and a facial cleanser. Please keep in mind that you must wear a red mask for 12 hours, so plan accordingly. MelanX is also available as an at-home kit for purchase on our website.

BODY PEELS

LEVEL I CHEMICAL PEEL

\$ **300** +

This chemical peel works well for small areas of the body. These areas include:

- ▲ Lips
- ▲ Underarms
- ▲ Elbows
- ▲ Back
- ▲ Feet
- ▲ Hands
- ▲ Chest/decollete
- ▲ Knees
- ▲ Shoulders
- ▲ Abdomen
- ▲ Intimate area
- ▲ Booty
- ▲ Arms
- ▲ Legs & more

MELANX LEVEL II CHEMICAL PEEL

\$ **450** +

This pigment-reducing chemical peel works wonders to lighten unwanted discoloration from smaller areas of the body, including:

- ▲ Lips
- ▲ Underarms
- ▲ Elbows
- ▲ Back
- ▲ Feet
- ▲ Hands
- ▲ Chest/decollete
- ▲ Knees
- ▲ Shoulders
- ▲ Abdomen
- ▲ Intimate area
- ▲ Booty
- ▲ Arms
- ▲ Legs & more

Please note prices listed are simply starting rates. Final pricing is determined in-person during the consultation with your provider when surface area is evaluated.

FULL BODY PEEL

\$ **5,000** +

Treat your entire body, usually broken up into 2 sessions.

PRIVATE PEEL: INTIMATE AREAS

\$ 300+

Want to improve discoloration, razor bumps, and texture on intimate areas? Our Private Peel can be done anywhere on the body to help with stubborn skin. The Private Peel comes with a 25-day skincare regimen that continues to penetrate the skin giving you fresh new skin in areas you want to show. This peel usually requires 2-3 sessions for optimal results.

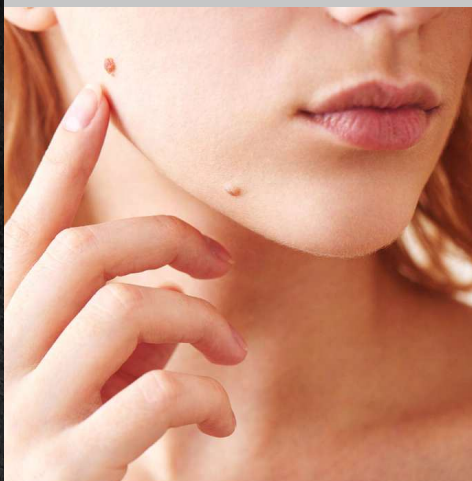

PEACH PEEL: ANAL BLEACHING

\$ 450+

Lighten darkened skin with our custom chemical peel bleaching treatment. This procedure comes with an aftercare kit that includes bleaching cream to continue to lift and lighten the area. Our Peach Peel can be applied on just the butt, anus, or both.

MOLE REMOVAL

\$ 300+

Moles are a simple fact of life. And unless they're cancerous, they pose no threat to your health. But, of course, if you don't like your moles and wish to remove them, that's possible. Removing a mole is a relatively quick, simple, and painless way to create unmarred skin for the long haul.

Aesthetic mole removal removes a benign mole from any part of the body or face. Lasers quickly eliminate the appearance of unwanted moles and even skin tags without the need for more invasive procedures. A short burst of light is delivered to the mole, breaking down the pigment and skin cells without affecting or damaging the surrounding skin.

LASERS

There are many lasers available to address your skin concerns and improve the health and appearance of your skin. However, lasers are individual and require special pre-assessments to determine the best fit for your concerns. Therefore, we recommend a full consultation with one of our skilled providers to determine the best laser treatment for you.

PICO LASER

\$ **850** +

The Pico laser technology is highly versatile and can effectively treat multiple skin conditions, including pigment issues, acne scars, skin texture, and tattoo removal, making it a safe option for darker skin tones. It also stimulates collagen production to promote skin renewal. One of the key advantages of Pico laser treatments, which are slightly less aggressive than CO2 lasers, is their ability to deliver impressive results with minimal downtime. Patients often experience shorter recovery times than traditional laser treatments.

CELEBRITY LASER TREATMENT

\$ **250** +

The Celebrity Laser Facial uses the Laser Genesis machine for a specialized facial that relies on a laser to gently and safely heat the skin to stimulate collagen production and new skin cells. Laser Genesis is non-invasive and non-ablative, meaning no recovery or downtime. The quick procedure can improve the skin's texture and tone and reduce the appearance of common signs of aging, like wrinkles and fine lines, and dark spots. It also helps with scarring, large pores, and redness and can even improve the appearance of broken blood vessels, which improves redness and even rosacea. Treat all skin concerns in one treatment: diminish large pores, tighten skin, reduce acne scarring, even & brighten complexion.

404.430.4378

CO2 LASER SKIN RESURFACING

\$ **850** +

CO2 Laser Skin Resurfacing is a popular laser treatment for restoring the skin's youthful appearance. Perfect for skin experiencing the signs of aging, sun damage, discoloration, skin tone, and texture issues, CO2 laser skin resurfacing relies on fractional technology to deliver precise energy channels to the skin in a uniform pattern. CO2 lasers only allow the energy to treat specific areas to improve collagen and elastin in the skin with minimal damage.

PAIN FREE LASER HAIR REMOVAL

\$ **150** +

Laser Hair Removal is the ideal solution for ridding the body of unwanted hair on both the face and body. Permanent hair removal eliminates the need to constantly wax or shave and reduces the potential for nicks, cuts, and ingrown hairs. In addition, laser hair removal leaves the skin smooth and soft and is perfect for both men and women.

TATTOO REMOVAL

\$ **150** +

With the newest and most advanced laser tattoo removal system available, we can make it easier than ever to rediscover your skin. By using a superfast pulse of energy quickly and effectively, our laser tattoo removal device can break down tattoo pigment that the body then naturally eliminates—it also works on ghost tattoos. As a result, you'll be left with smooth skin and no ink.

404.430.4378

FACIALS

Facials have been a long-standing staple in aesthetics and medical-grade skincare. But the standard facial has gotten a significant makeover, and today's skin-rejuvenating and pore-purging treatments go beyond basic exfoliation and extractions.

SELF-CARE FACIAL

\$150+

Our Self-Care Facial is a personalized skincare treatment that nurtures the skin while recharging your spirit. Our self-care facials include four treatments. It typically begins with a thorough double cleanse, where gentle yet effective cleansers remove impurities and makeup. Next is dermaplaning, treatment that utilizes a professional sterile surgical scalpel to exfoliate the skin's surface and gently remove dead skin cells and peach fuzz. Following dermaplaning is steam that opens up the pores and prepares the skin for deeper penetration of subsequent treatments. Finally, our luxurious lavender jelly mask treats oily skin and acne, reduces redness, and clears and calms the pores while infusing the skin with hydration.

LIQUID GOLD FACIAL (MESOTHERAPY)

\$350+

Gold Infusion Facials use a tiny device that creates micro-channels in the skin (similar to microneedling) to infuse a customized elixir of skin-improving ingredients and enhancers into the superficial layers of the skin. A Gold Infusion Facial is a unique treatment that utilizes tiny gold-plated needles in a handheld stamper to deliver a blend of nourishing and hydrating ingredients and wrinkle reducers into the skin. Some versions use Botox, while others create a custom cocktail with ingredients such as hyaluronic acid, vitamin C, and hydrating agents. Since the Gold Infusion Facial uses tiny needles, the treatment can be micro-targeted to hard-to-reach and hard-to-treat areas like right around the lips and under the eyes. The effects of the Gold Infusion Facial are fast and dramatic, making them the perfect treatment to achieve glowy skin.

404.430.4378

MORPHEUS8

\$1,200+

Morpheus8 is a radiofrequency microneedling that increases new collagen and firms and lifts the skin (especially in the chin, neck, and jowl area) for a smoother, younger-looking appearance. The treatment creates controlled micro-injuries within the skin, producing new collagen and improving texture and tone. Unlike a laser, which emits a single wavelength of energy absorbed by the skin, RF microneedling uses needles plus energy to mechanically injure the skin while heating it to create a wound-healing response.

Morpheus8 is a safe and effective non-surgical minimally-invasive RF fractional device that works on multiple areas of the body to reduce fat, stimulate collagen, and tighten the skin. It also helps to reduce acne scars and improve the appearance of stretch marks, lax skin, fine lines, and wrinkles. This bipolar fractional tissue treatment stimulates collagen production in the dermis while also treating fat (in certain areas) by emitting heat to remodel collagen on the face and body. As new collagen forms and the skin contracts, it becomes tighter and more youthful-looking.

The needles on the Morpheus8 device can reach up to 8 millimeters deep within the skin for greater penetration. But not all areas need this depth (the body can handle more than the face), which is why the needles are of varying depths. In addition, the Morpheus8 dual handpieces allow for treating smaller and larger areas. There are also four fractional tips with different microneedle configurations: Prime with 12 pins; Resurfacing with 24 pins; Morpheus8 with 24 pins; and Body with 40 pins. Morpheus8 also features a burst mode of RF energy to automatically deliver the energy at different depths during a single cycle. This allows the treatment to address all three skin levels in millisecond intervals for a shorter treatment time and better uniformity. It also helps decrease the potential for skin injuries and enables full-body fractional procedures to be customized.

The results from Morpheus8 are not instant and take time to show. So while you may notice an initial glow after the treatment, it can take at least three months to see the total result.

PLATELET-RICH PLASMA (PRP)

\$300+

This regenerating and rejuvenating treatment for the skin involves drawing a sample of a patient's blood and separating the plasma from everything else. The growth factors within the PRP work to quickly and effectively regenerate the skin, reverse the signs of aging and damage, and heal injured tissues. In addition, the platelets act as a reservoir of growth factors that have collagen-stimulating effects on the skin. As a result, PRP offers various benefits to the skin, including increased collagen production, reduced fine lines and wrinkles, tighter skin and improved skin tone, improvement in acne scars, a natural brightness to the skin, healthier-looking, and acting skin.

MICRONEEDLING

\$300+

Microneedling is a skin rejuvenating treatment that uses collagen-stimulating needles to correct almost every skin concern possible, from smoothing out lines and wrinkles to reducing the look of acne scars and everything in between. The professionally-administered procedure improves collagen for healthier, better-looking skin. Microneedling uses tiny stainless steel needles rolled or stamped onto the skin to create micro-injuries (safe, controlled injuries that incite the skin's healing process). These micro-injuries create open skin channels that allow specific serums and ingredients used during the treatment to penetrate deeper for optimal results. As these wounds heal over the coming days and weeks, the skin becomes smoother, plumper, and more youthful.

Microneedling offers a plethora of benefits which is why it's used to improve everything from hair loss to acne scars and stretch marks. Of course, it immediately creates glowy, dewy skin. But it offers other benefits, like stimulating dormant hair follicles, increasing collagen production, diminishing fine lines, wrinkles, and minimal sun damage, enhancing the skin's texture and minimizing the appearance of enlarged pores.

DERMAPLANING

\$100+

Dermaplaning rids the outermost layer of dead skin from the surface while simultaneously removing peach fuzz. The pores are less likely to be clogged by eliminating dead skin cells. The treatment also allows light to reflect correctly off the skin giving it a luminous glow. A quick dermaplaning session leaves the skin feeling smoother to the touch, equating to makeup that glides on and looks flawless. Many dermaplaning fans continually do the treatment because it's a downtime-free treatment that provides instant results, like smoother, brighter, and softer skin.

DIAMOND GLOW

\$250+

The DiamondGlow Facial is a dermabrasion treatment that safely and gently removes the uppermost layer of skin to deliver topical supercharged serums into the skin. The DiamondGlow Facial features a patented recessed diamond tip wand that gives a next-level resurfacing treatment to deeply clean and rejuvenate the skin. Special precision diamond tips are used during a Diamond Glow treatment to reveal new, fresh skin while deeply cleansing the pores, extracting impurities, and infusing specialized SkinMedica Pro-Infusion Serums into the skin. As a result, DiamondGlow reveals softer, smoother, more luminous skin that's clear, healthy, and even in tone. With fewer dead cells on the surface, these serums penetrate better and quicker for more dramatic effects on the appearance of the skin and its health.

SIGNATURE FACIAL

\$350+

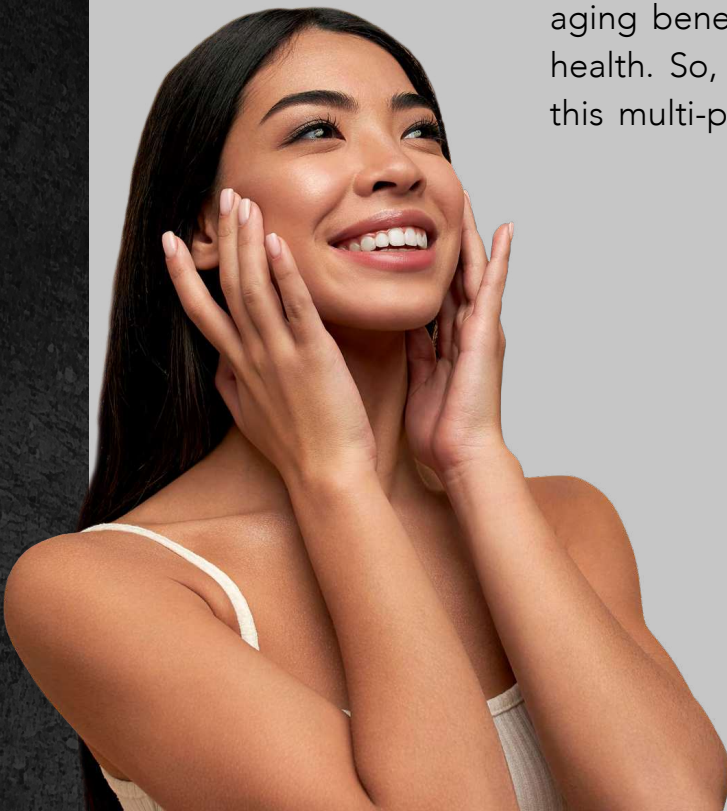

Facials are one of the most tried-and-true treatments for improving the skin. Suppose you're looking to get your skin on the path to healthy while ridding your complexion of impurities, improving its texture, tone, and glow, and restoring a youthful look to your skin. In that case, one of our signature facials is a treatment to consider. Our Signature Facial can be customized to fit your skin needs. It may include oxygen, dermaplaning, a hydro jelly mask, extractions, and even a chemical peel to help clarify, hydrate, and brighten it.

SKINWAVE FACIAL

\$200+

Skinwave is a popular facial that does double duty to cleanse, exfoliate, and hydrate the skin deeply. More than a standard facial, it also provides anti-aging benefits coupled with those that address skin health. So, whatever your skin concerns consist of, this multi-purpose treatment will address them.

A Skinwave Facial deeply cleanses the skin while gently exfoliating and hydrating it to improve various skin conditions, like acne, dryness, and wrinkles. The treatment's unique delivery system, skin-revitalization solutions, and hydrogen therapy make the facial multi-dimensional yet effective skincare treatment. Unlike other skin-improving treatments, the Skinwave Facial is suitable for all skin types and tones.

BODY TREATMENTS

There are a lot of treatments available to help you get that much closer to the body of your dreams. These are some of the most popular ones at Charette Cosmetics.

PHYSIQ BODY SCULPTING

\$350+

What used to take months, if not years, of time in the gym can now be accomplished with a few sessions of PHYSIQ Body Sculpting. The newest advancement in body contouring treatments is PHYSIQ Body Sculpting, which reduces fat and defines muscle. The Italian-designed device is a cutting-edge, modern-day aesthetic treatment that is safe, fast, and effective. A single non-invasive treatment addresses both fat reduction and muscle stimulation to put you that much closer to the body of your dreams.

PHYSIQ uses a specialized technology known as Sequential Thermal and Electrical Pulse (STEP), exclusive to the device. The STEP technology allows heat and muscle stimulation to alternate throughout the treatment to create optimal results. The downtime-free treatment uses different modalities to treat a variety of areas of the body for noticeable results over time. The treatments are also painless and downtime-free, a big plus for patients.

PHYSIQ targets fat and muscle in a single treatment, whereas other body sculpting devices only hone in on one or the other. As a result, the results are always natural-looking and complementary to the body for a proportional look.

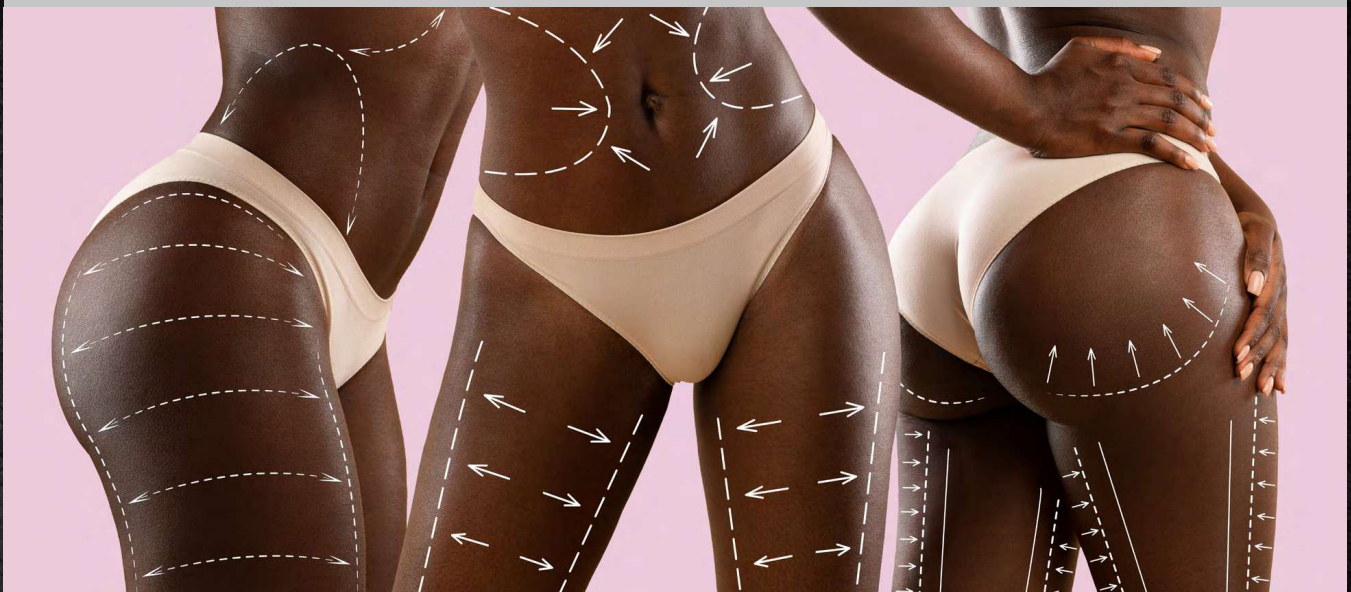

MORPHEUS 8 FOR BODY

\$1,500+

If you want to tighten saggy skin on the stomach, arms, or butt without undergoing plastic surgery, a non-surgical radiofrequency microneedling like Morpheus8 for the body can do the trick. The safe and effective procedure smooths and tightens loose skin while targeting stubborn pockets of fat for full-body subdermal adipose remodeling. By delivering the deepest levels of radiofrequency energy—up to eight millimeters—to trouble spots, micro-injuries are created within the skin to stimulate collagen production and tissue contraction. As the body heals and new collagen forms, the treated area becomes thicker, firmer, and more youthful-looking.

Morpheus8 effectively treats the stomach, butt, thighs, bra roll, knee area, flanks, and arms. It can also be used to improve definition, smooth out cellulite and crepey, rippled-looking skin, and decrease the appearance of stretch marks.

In addition, the device features a burst mode, which automatically delivers the RF energy at different depths during a single cycle. This allows the treatment to address all three skin levels in millisecond intervals for a shorter treatment time and better uniformity. It also helps decrease the potential for skin injuries and enables full-body fractional procedures to be customized.

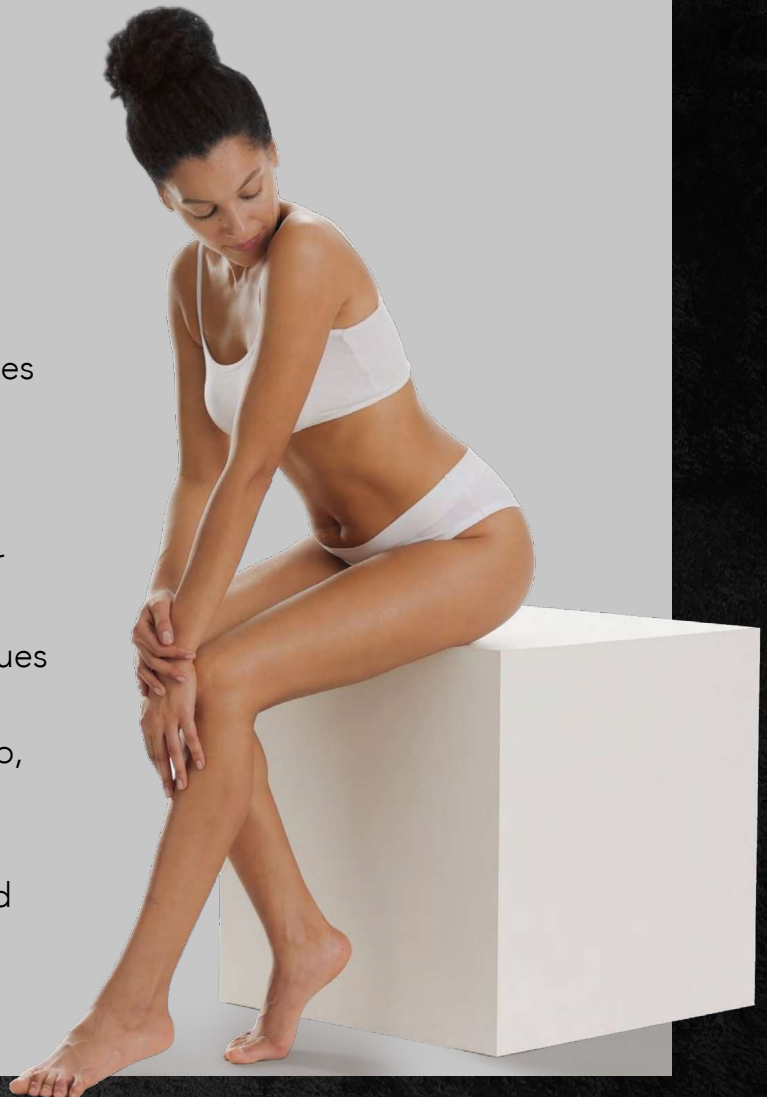

VAGINAL REJUVENATION

\$1,500+

The female body goes through several life-changing events like childbirth, menopause and the natural aging process. Fluctuating hormone levels from these natural occurrences often affect the vaginal area. Modern-day advancements in science, and procedures like FormaV/VTone with Morpheus8, which combines microneedling with radiofrequency, help alleviate common issues like painful sex, looseness, dryness, urinary incontinence, low libido, and an aged labia can with just a few treatments.

Morpheus8's tiny needles create micro-injuries in the skin and, at the same time, deliver controlled pulses of radiofrequency energy deep within the vaginal walls and to the external labia skin, increasing collagen and elastin production for tighter tissue. As the device creates tiny channels within the area, these wounds signal the body to start the wound healing response mechanism. As a result, the body creates fresh new collagen and elastin, which makes the vaginal walls thicker, more lubricated, pliable, and youthful. By tightening the vaginal wall, the bladder and urethra are also lifted, taking pressure off of them and improving issues with incontinence. It also encourages collagen synthesis in the labia to plump, smooth, and tighten them for a more rejuvenated look. The procedure also makes patients feel more confident and comfortable in their skin.

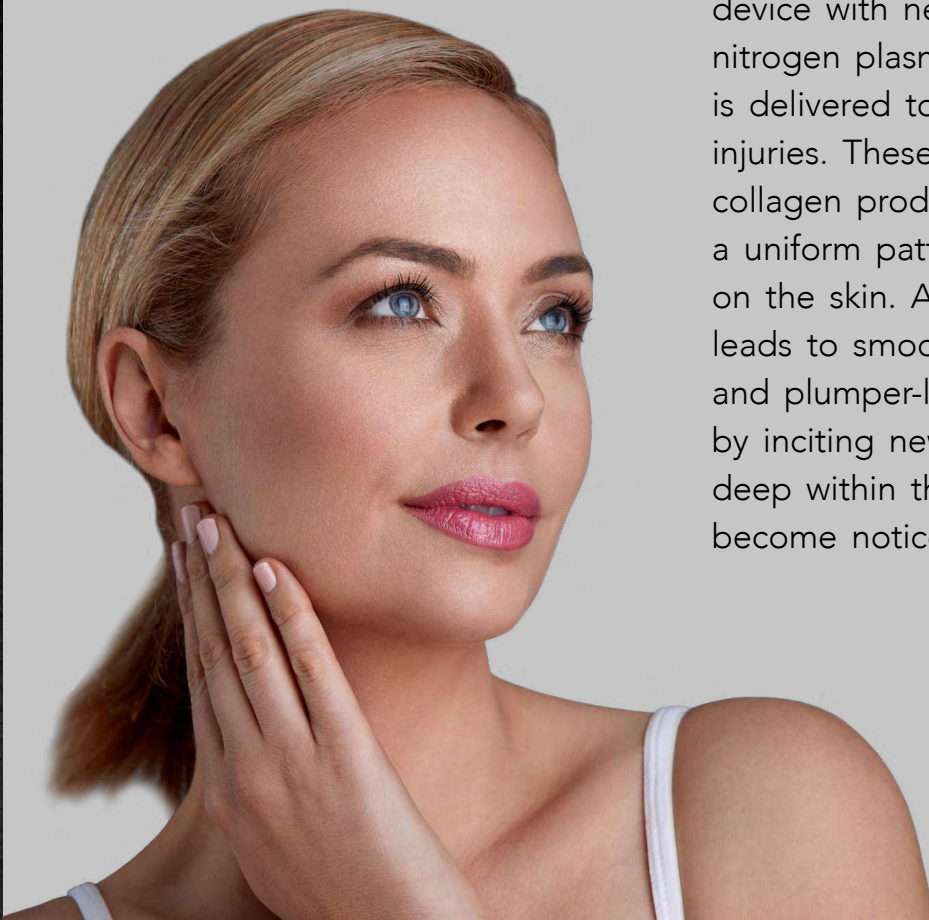

PLASMA PEN

\$400+

The Plasma Pen is one of the world's most advanced non-invasive options to lift, tighten, and rejuvenate the skin without any downtime. It treats wrinkles, fine lines, and sagging skin and brightens dull-looking skin. The Plasma Pen uses plasma energy (different from plasma drawn from your blood and used in treatments like PRP) to safely and gently regenerate the skin via targeted heat delivered deep into the skin. Stimulating collagen deep within the skin encourages a smoother texture with fewer lines and wrinkles for a more youthful appearance.

A Plasma Pen is a small handheld device with needle tips that produce nitrogen plasma gas. The plasma gas is delivered to the skin and micro-injuries. These micro-injuries stimulate collagen production and leave behind a uniform pattern of pin-sized dots on the skin. An increase in collagen leads to smoother, healthier, tighter, and plumper-looking skin. In addition, by inciting new collagen production deep within the skin, problem areas become noticeably firmer.

404.430.4378

INJECTABLES

Injectables and fillers are among the most popular categories in aesthetics and for a good reason. They can erase wrinkles, plump up poorly defined features, and improve the face and body to stop the hands of time.

BOTOX

\$12+ /unit

The injectable Botox has become synonymous with erasing wrinkles and smoothing the skin. Botox uses an FDA-approved toxin (botulinum toxin type A) to erase expression-related existing wrinkles and lines and prevent them from forming. Botox is one of the most popular entry-level treatments since it offers dramatic results with no recovery and minimal risk.

Botox is a quick treatment that temporarily blocks nerve receptors that live on the muscle for limited movement. Therefore, the skin appears smoother, and lines and wrinkles disappear. It also helps reverse the common signs of aging, like wrinkles and fine lines around the eyes, eyebrows, forehead, and neck. Besides its cosmetic applications, Botox also has medical indications, including improving excessive sweating and alleviating migraines and pain related to TMJ (temporomandibular joint disorder). For those that suffer from deep, etched-in wrinkles and lines that don't respond to over-the-counter creams and serums, Botox is like a magic eraser that smooths the skin.

DERMAL FILLER

\$800+

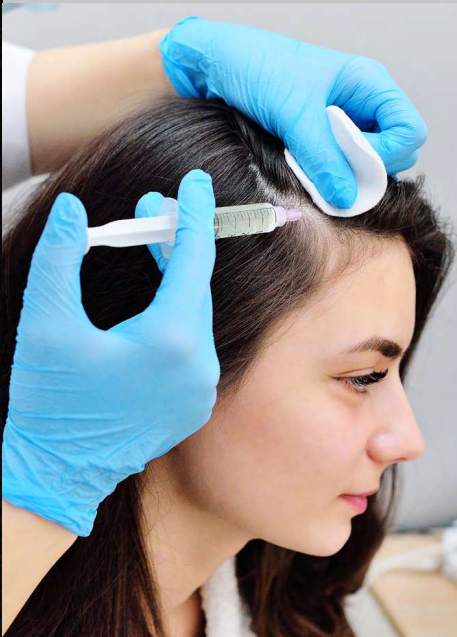

Dermal fillers are popular for restoring lost volume to the face while sharpening up the contours of the face for a refreshed appearance. Strategically injecting filler into areas where fat has been lost allows these features to be instantly rebuilt. In addition, filler helps restore volume and correct the signs of aging and sagging in the lips, mid-face, and lower face.

Some of the more popular areas to inject filler include the lips, cheeks, jaw, chin, nose, and under the eyes. At Charette Cosmetics, we inject Restylane, Juvederm, Radiesse, Revanesse Versa, Bellafill, and RHA fillers.

HAIR RESTORATION PRP

\$850+

Hair restoration with PRP is one of the most reliable and effective treatments for stimulating hair growth and rejuvenating aging and thinning hair. A small amount of drawn blood is injected into the scalp to trigger natural hair growth using a three-step medical process. PRP is a significant player in the hair growth category and provides dramatic results.

PRP injections contain potent growth factors and maintain hair growth by increasing blood supply to the hair follicle and increasing the thickness of the hair shaft.

INSTANT BBL

\$2,500+

An Instant BBL is a surefire way to get a rounder, more shapely backside plus lift and volume. The Instant BBL treatment is downtime-free and can improve asymmetries in the butt and/or hips. Plus, it reshapes the S-shaped curve of your profile and gives instant results.

Using injectable fillers, like Radiesse (a long-lasting dermal filler), the Instant BBL can also even out hip dips and improve skin texture and cellulite by promoting collagen synthesis. The results of this non-surgical treatment last for several years. The Instant BBL works for all bodies and provides an immediate booty boost.

404.430.4378

PENIS ENLARGEMENT

\$2,100+

Penis Enhancement is great for men who may want a larger, thicker penis. We can achieve this by using dermal filler that is injected into the shaft! The patient will achieve an enlarged penis immediately after the procedure. Expect 0.5-1 inch of girth improvement after your initial treatment.

The price for penis filler is \$700 per a syringe, this procedure requires a minimum of 3 syringes. There is little to no pain, and you achieve instant results.

KYBELLA FAT DISSOLVER

\$900+

Kybella is an injectable treatment that targets excess fat under the chin. It uses deoxycholic acid, which is found naturally in the body, to dissolve fat permanently. Taking just a few minutes to perform, Kybella delivers results as good, if not better, than other fat-reducing procedures and surgeries. Kybella works by causing fat cells to burst and then reabsorb back into the body, eliminating fatty pockets.

MEDICAL-GRADE SKINCARE LINE

Charette Cosmetics' medical-grade skincare line is the perfect accompaniment to our in-office professional treatments. Using high-quality ingredients and innovative formulas, these products will help prolong your results and maintain the health of your skin.

These at-home and on-the-go skin regimens improve tone and texture for brighter, fresher skin. Our most popular products include:

ACNE-PRONE PACK

Keep breakouts at bay.

It includes the Refresh + Restart Gentle Cleanser, Activate + Tone Antioxidant Mist, Diminish + Clear Complexion Pads, and Rejuvenate + Reverse Retinol Serum

PIGMENTATION PACK

Remove discoloration and hyperpigmentation.

It includes the Illuminate + Purify Exfoliating Cleanser, Activate + Tone Antioxidant Mist, Nourish + Soften Moisturizer, Perfect + Preserve Sheer SPF 50, Brighten + Enlighten Prescription Pads

Charette Cosmetics believes in the power of effective skincare to maintain your in-office results at home. That's why we formulate and offer our own line of medical-grade skincare, which will keep your skin healthy and looking its best. To purchase these products and more, shop our entire range of skincare products in our e-commerce store at charettocosmetics.com

TRANSFORMATION PACK

Completely transform your skin.

It includes Illuminate + Purify Exfoliating Cleanser, Diminish + Clear Complexion Pads, Activate + Tone Antioxidant Mist, Hydrate + Plump Hyaluronic Acid, Nourish + Soften Moisturizer, Perfect + Preserve Sheer SPF 50, Rejuvenate + Reverse Retinol Serum

PLUMP PACK

Ultimate hydration to reduce the appearance of fine lines and wrinkles.

It includes Restart + Refresh Gentle Cleanser, Activate + Tone Antioxidant Mist, Nourish + Soften Moisturizing Lotion, Hydrate + Plump Hyaluronic Acid Serum

GLOWING DUO

Brighter skin.

It includes Hydrate + Plump Hyaluronic Acid Serum and Repair + Restore Vitamin C Serum

ANTI-AGING PACK

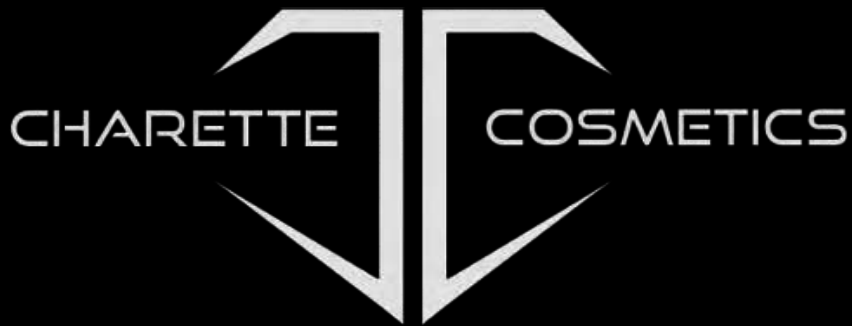

Reverse the signs of aging.

It includes Firm + Lift Neck Cream, Refresh + Tighten Eye Cream
